TO WHOM IT MAY CONCERN

**Subject: Victor Lindholm**

Victor Lindholm is a student at the Media Technology programme at Linköping University.

I work as Associate Professor in Automatic Control and I am responsible for courses in the Control System area given to students at the third year in Master of Science in Media Technology at Campus Norrköping, Linköping University. In particular I am examiner and responsible for the Automatic Control course, the Modelling and Simulation course and the Modelling Project.

Victor has attended the Automatic Control course in the first term of Fall 2023 and the Modelling and Simulation course in the second term of Fall 2023. Victor has taken part to the Modelling project during the first term of Spring 2024. During this course, Victor, together with his group, has worked at the modelling and animation of a buoy floating in the water. The project work has resulted in a high level graphical animation showing great capabilities in many fields within engineering such as physics, programming and simulation.

Feel free to contact me if you have any questions.

Sincerely,

Anna Lombardi  
Associate Professor in Automatic Control

Norrköping, 8 March 2024
